

Friends of Pittock Woodstock Cycling Club

The Woodstock Cycling Club and all of its members wish to give a show of support for the group “The Friends Of Pittock”. Our club fully supports what this group is trying to achieve and has made a financial donation to the group to back our words.

The environmentally sensitive areas this group are trying to protect from development have for years been home to many species of wildlife. These areas are well used now by people walking their dogs, riding their bikes, and just enjoying the great outdoors. To develop these would be a travesty!

Woodstock does not need another golf course! We need to have more green areas to promote people getting out and getting exercise. The wildlife around the Thames River and Pittock Lake do not need anymore disturbances. From the towering apartments along the lake, to all the construction mess of the Toyota plant and the C.P. rail line going into Toyota, our lakeshore has been disturbed enough!

Please support this group in any way you can. These areas must be saved from the developers!

Thanks!

**Signed,
Members of the Woodstock Cycling Club**
